

Season 1 Episode 9

Vilozoma

In space in some universe in the Ultraverse, a giant purple and black goo-like entity zips through space. It finds a planet that is peaceful and populated by a technologically advanced species. The main sphere of goo stays in orbit of the planet and it sends down several tendrils of purple and black goo down on the planet. The people are devastated and their army comes in. The goo overtakes the army and it engulfs them. Within hours, the planet is completely engulfed in purple and black goo and it is inhabited with purple and black goo figures. The sphere in orbit leaves orbit and travels to a different planet.

Ivan is asleep in bed with his clock showing it is 1:38AM. A red-light flashes with a blaring alarm sound. Ivan jumps up and his eyes go big. Ivan said, "What's happening?" Ivan sees his TV turns on and it says, "ALERT!" on the screen. Ivan said, "What kind of alert is this?" Safron barges into Ivan's place and Safron said, "Ivan! There is a catastrophic monster that is engulfing a lot of the worlds in a universe. This thing is powerful and it has the potential to spread to other universes in the Ultraverse. They need all of us."

Ivan, Safron, Dirk, Keith, and several other monks show up at the monastery where Grand Master Augi stands at a large table showing holographic images of planets and the monster. Augi said, "I read about this creature. I have studied it hoping the more I studied it the less likely I would have to combat this thing. It looks like that day has come." Ivan said, "What is this, 'creature' you speak of?" Augi said, "It is the mythological beast known as, 'The Vilozoma.'" Ivan said, "Vilozoma?" Augi said, "It is a creature that has appeared in ancient Ultraverse folklore. It lives by consuming all the resources of planets leaving them dead and ruled by strange goo-like beings. There have been reports of this. In the universe designated, I8-75, there is one of these Vilozomas. In the last 48 hours, a handful of planets capable of sustaining life had been engulfed by the thing and there is no contact from any of those planets. Since this threat not only is a threat to this universe but to other universes since it has godly potential, it is our job to make sure this Vilozoma never leaves its indigenous universe and spreads to the Ultraverse or other universes. The Ultraverse is in grave danger. I

am sending all you monks to combat this. You are our best monks. I would trust the fate of the entire Ultraverse with you.”

Ivan and all the other monks are placed into monk transports where they are sent to a large highly populated and technologically advanced planet with a thriving society and is a prime target for the Vilozoma. The monks examine the lush greenery that surrounds the mostly white buildings with fluid colored lights. The chairman of the planet greets the monks. The chairman said, “Welcome monks of the Ultraverse. I am glad you are here. I welcome you to this planet of Echo Verde. We are a thriving society that has withstood thousands of wars and conflicts. There has never been a threat that brought us down. Unfortunately, recent events may change that. We have anticipated mythological beings may attack us so we developed plans for attack.”

The chairman brings the monks to a biometrics lab where all sorts of biological weapons are being tested. The chairman shows the monks a giant syringe filled with a red and green fluid. The chairman said, “Some of our researches visited some of the devastated planets and collected samples of the purple and black goo. We did all sorts of tests and we came up with a weakness. The molecular cohesion of the goo seems to deteriorate when it comes in contact with the formula in the syringe. We have anticipated that if we inject this syringe into the main sphere which seems to serve as the source conscience of Vilozoma, the Vilozoma’s conscience will be destroyed and in theory, all the planets it controls will be free again. It seems the main conscience rests in the sphere and it controls every instance of Vilozoma known.” There is a blast that rattles the lab. One of the workers said, “Chairman, it is here.”

They all go outside and they watch the Vilozoma sphere enter orbit of the planet. The chairman said, “I need you monks to take my syringe up there and give it to the sphere. I think Keith should be placed in charged of this based on his record.” Keith salutes the chairman and he said, “I shall do as I must.” Keith, Ivan, Safron, and Dirk fly in a monk transport with the syringe and they take it to the sphere in orbit. They are guarded by squadrons of monk fighters. Keith said, “I’m in position. I detected a point to inject the syringe.” The Vilozoma throws several tendrils of purple and black goo at the monk squadrons. The goo destroys several of the monk fighters. Some of the goo hits the transport and it spins out of control. Keith controls it so it is stabilized again. Monk fighters fire at the Vilozoma and the tendrils that come out of it. The Vilozoma starts sending out balls of goo at the fighters. The fighters dogfight with the balls of goo.

Ivan and Safron stay aboard the transport and monitor all the surroundings while Keith and Dirk go into spacesuits and they take the syringe to the Vilozoma. Keith and Dirk walk on the surface of Vilozoma and they both grab onto the syringe and they are

about the jab it into the Vilozoma but the Vilozoma starts to quake. It moves around and it sends balls of goo directed at Keith and Dirk. Keith takes out his cyan sword of redemption and he slashes down the balls of goo. While Keith is slashing down the balls of goo, Dirk jabs the syringe into the Vilozoma. The Vilozoma violently quakes and it erupts into more balls of goo and a purple and black liquid. The purple and black liquid falls down to the planet and the sphere is no more. There are still remains of the sphere flying violently fast in orbit. Keith and Dirk return to the transport. Safron said, "It looks like you destroyed the thing but it looks like what is left of it is coming down to the planet." The goo rains down on the planet and engulfs large sections of the planet. Keith said, "We destroyed the sphere. We must leave at once. We have to tell the inhabitants of the planet to evacuate and to accept the fact that their planet is doomed. At least it cannot take over any more planets." Some remains of the sphere hit the ship and the ship spins around. Safron and Keith try to control the ship. Safron said, "The ship won't stabilize." Keith said, "It looks like our stabilizers are malfunctioning." Ivan looks over specs and he said, "It looks like our orbiter has failed too." The transport spins out of control and it falls to the planet and crashes in a forest not far from the main city.

The monks look at the remains of the ship. Ivan said, "It looks like we'll be stranded here until the Vilozoma finds us." Keith said, "I will have to call Master Augi." Keith goes to his wristwatch and Keith said, "Grand Master Augi." Augi appears on the screen of Keith's watch. Keith said, "We destroyed the sphere but it looks like the remains of the sphere are continuing to devastate the planet of Echo Verde. Our transport has been damaged to a point where it no longer works. We need to get as many people off this planet as possible." Augi said, "I will send some transport squadrons to you but it may not be safe. There still appears to be balls of goo violently flying through orbit and it is not safe to send anyone to that planet right now. You are going to have to live on your own. I recommend staying in your transport. It still should have some shields that may be useful against, Vilozoma." Safron said, "We can't just stay out here." Dirk said, "We are going to get killed either way. I would rather die trying to fight these freaks than die hiding here like a coward." Keith said, "Augi told us to stay in our ship and that is what we should do." Ivan said, "He did say, 'recommend' which means he suggests that we do such. He never gave us an official order to do such." Safron said, "My Ivan. Always reading between the lines." Safron hugs Ivan. Ivan said, "We know it is only a matter of time before we are found and murdered by the Vilozoma. We may be able to stop it if we have more of its weakness." Keith said, "That lab we went to may have some more of the fluid formula. We just have to fight our way to the lab."

Ivan, Dirk, Safron, and Keith arm themselves with their swords and they brave their way to the lab. They fight off the Vilozoma creatures in the street. They make it to the lab. Dirk said, "This place looks like it did when we came earlier." Ivan said, "It

doesn't look like it took much damage." Keith said, "We have no time to lose. We must locate the fluid formula. The monks walk through the lab. They go back to where the syringe was and they open the drawers and there is nothing in them. Dirk said, "What gives?" Keith said, "There must be some more of that formula here. Surely they couldn't have just made one dose." The chairman's voice said, "There only was one dose." Ivan looks in an enclosed section in the wall and he sees the chairman there. Ivan said, "Tell us how we can make more of the Vilozoma's weakness." The chairman said, "That's the problem. The ingredients are so rare and it takes such a long time to produce the fluid that we only made one. It would take a few weeks to make another dosage like the one you took into space." Ivan grabs onto the chairman and Ivan said, "There must be a way to get more of this formula now." The chairman said, "You are asking for something that doesn't exist." The wall behind the chairman breaks and an oval with a scary and demonic face smashes out from behind the wall and it eats the chairman. All the monks draw out their swords. The Vilozoma said, "You fools. I heard everything. That formula you used did nothing. It only made me weaker and grounded but that is temporary. In time, I will grow back to full size and travel to more planets. You are only prolonging the inevitable."

Dirk raises a fist to the Vilozoma and Dirk said, "You may think you have won but you didn't. You may be able to eat all of us and drain worlds of life but the one thing you won't drain from us is our spirit." Safron said, "You said it." Dirk said, "We can take this thing on." Vilozoma said, "You and what army? All those other monks that came with you have either been destroyed in orbit or consumed by me. You are all alone. You have no allies." Safron said, "We have each other. We have two of the greatest minds in the Ultraverse at our side." Safron points to Ivan and Keith. Vilozoma said, "Suit yourself." The Vilozoma releases several tendrils. Ivan and Keith cut them up with their swords. Dirk gets caught in the tendrils and eaten by the Vilozoma. Ivan yells, "DIRK!" Safron said, "We must get out of here." Safron takes out her skateboard and she skates fast and she picks up Ivan and Ivan picks up Keith. Safron skates down a railing and skates out of the lab.

Safron quickly skates down the street and the Vilozoma is chasing them down the street. Keith said, "I don't think a skateboard can outrun the Vilozoma." Safron said, "I won several skateboard championships in my time. I can outrun him." The Vilozoma gets close to Safron's skateboard and it sends a tendril to one of the back wheels and rips the wheel off causing Ivan and Keith to be thrown off. The Vilozoma grabs onto Safron and consumes her.

Ivan and Keith see what happened to Safron. Ivan said, "You monster. You are going to pay for this." Vilozoma said, "With what? Your blood? That is what there will be more of in a few moments." Ivan and Keith draw out their swords. Vilozoma said,

"You are still pulling this crap at me?" The Vilozoma throws out hundreds of tendrils and Ivan and Keith deflect them and cut them with their swords. The Vilozoma keeps sending out tendrils nonstop and Ivan and Keith keep blocking them with their swords nonstop. Ivan said, "How large do you think this entity is?" Keith said, "It is probably infinite." Vilozoma said, "You guessed right. I am infinite. I am infinite strength and infinite knowledge. I know everything about you, Ivan. I know about the hardships that were placed on you by that unfair principal and teachers." Ivan slightly jerks himself and the tendrils wrap around Keith's sword causing it to fall out of his hands and land on the ground. Keith gets tied up in the tendrils and he gets consumed by Vilozoma.

Vilozoma stands triumphantly over Ivan. Ivan said, "How do you know so much about me?" Vilozoma said, "I absorb everything I see and hear and eat. I have your friends' collective knowledge. I know what all your weaknesses are. I know what your motive is. I even know the truth about your father and where he is." Ivan said, "You know my father?" Vilozoma said, "I know him very well. I can show you where he is. He is somewhere and something you may never understand. Or at least, it could not be understood by anyone but you. You are not just anyone. You are the, Ivan. You serve an important purpose and goal. You are more important than any of the people I consumed." Ivan said, "Is that why you are not consuming me now?" Vilozoma said, "You catch along quickly. We should join forces. We can rule over those people that deceived you and in return, I will show you your father and where he is at." Ivan said, "I cannot do this. I have been deceived too many times. I have met all kinds of people that told me they were my friends when they weren't. I know you are no different. You might as well just eat me now. I will never budge to your whims." The Vilozoma said, "Very well then." The Vilozoma jumps at Ivan and eats Ivan.

Ivan ends up in a white world where everything is a black outline. Ivan sees buildings and civilizations in the black outlines. Ivan sees his friends are captured and imprisoned. Ivan said, "What is this place?" Vilozoma appears as a black outline. Vilozoma said, "This is what my conscience is like. This my mind essentially. Everything I capture and absorb ends up here. Ivan said, "It looks like everyone is trapped in some prison. I don't seem to be trapped." Vilozoma said, "Indeed you are not trapped." Ivan said, "Why did you trap everyone else and not me?" Vilozoma said, "Let's put it this way. Have you ever noticed you are different from everyone else? Have you ever noticed that you don't really fit in and that everyone seems different from you?" Ivan said, "I was told I hold some special prophecy pertaining to the yin-yang." Ivan shows his yin-yang belt. Vilozoma said, "Let me be the one to tell you this. You are not human Ivan. You are a different humanoid creature. You belong to your own group of people. Your father is one of them and he is with them right now. I could take you to him. You would then avenge what you have lost and earn what you rightfully deserve." Ivan said, "Just give up already. You cannot force me into anything. As far as I'm concerned, I have already been consumed by you and I am a hopeless case and

you are just doing this to test my limits.” Vilozoma said, “If you don’t work with me, you will be subject to even more hardships that are worse than anything you could possibly imagine.” Ivan said, “Like what?” Vilozoma said, “Like these...” Vilozoma shows Ivan eery and creepy outlines of people that have wronged Ivan over the years. It has his evil principal and an evil teacher and people that used to experiment on him. Ivan sees more traumatizing memories. Ivan falls to his knees and he grabs onto his expanding head. Vilozoma said, “I know what makes you budge.”

Vilozoma said, “Do you want to work with me now?” Ivan looks to his left and he sees outlines of his friends in prison and being shown painful memories from their past. Vilozoma said, “If you join me, you will inherit my powers and you would be able to have your friends live freely again.” Ivan said, “I know there is a trick here. I know there is something you are not telling me.” Vilozoma said, “Suit yourself.” Vilozoma shows Ivan more scary and disturbing scenes in black outlines and Ivan yells, “RRRggghh” in pain. A ghost image of a yin-yang forms around Ivan. It grows and it creates a large explosion. The yin-yang explosion dissolves the painful visions. Vilozoma said, “What’s going on?” Ivan’s eyes turn into yin-yangs. Ivan’s fists turn to yin-yangs. Vilozoma throws tendrils at Ivan and they get burned when they make contact with him. Vilozoma said, “I didn’t know about this.” Ivan walks to Vilozoma and he throws his fists into him and Vilozoma is vaporized into nothing. Ivan appears back on the street of the planet, Echo Verde in broad daylight. All of Ivan’s allies are there too.

Safron runs to Ivan and she gives Ivan a hug and a kiss. Safron said, “I though we were all goners. Something strange happened in there.” Dirk said, “Yeah. What was that all about?” Ivan said, “I am not sure. I did something similar once but I don’t know how I did it or what caused it.” Keith said, “It may have something to do with that prophecy that was written about you. I have studied the yin-yang prophecy. Ivan may very well have some lifeforce that could be used to eradicate the evil stated in the prophecy. I shall do more research on this.” Ivan said, “What scared me most is that Vilozoma said I was not human.” Safron said, “Don’t listen to him. He was just saying that to manipulate you.” Ivan said, “I guess.” The chairman enters the scene and he said, “I am glad you monks saved my beloved planet. I am getting reports from other planets and they are all Vilozoma free.”

Keith is on a communication screen in Grand Master Augi’s office. Keith said, “Ivan did form a strange lifeforce consisting of a yin-yang. He used it to completely destroy Vilozoma. There were some other disturbing things in there. Vilozoma thinks Ivan is not human. Vilozoma also seems to know how to trigger things in Ivan and other people. Vilozoma had a special interest in Ivan.” Augi said, “Thanks Keith. I will have this noted.” Augi turns off the communication screen and he takes note of this and he

saves it in a special safe he has dedicated to Ivan. It contains yin-yangs, documents, news reports and more.
